

Cyclone System and Compactor C-500

HIGH TECHNOLOGY SHREDDING SYSTEM

KOBRA CYCLONE The Cyclone System is the ultimate development in shredding technology available on the KOBRA Cyclone shredder.

Blades rotating at a very high speed, combined with the power of a turbine providing the unit with an airflow, allow the shredding of up to 500 sheets of paper at a time as well as the shredding of many other types of materials into 5 different available particle sizes. The turbine generates a high pressure airflow and by making the air stream spin, particles are subjected to centrifugal forces and deposited from the airflow into the disposal bag.

This unique shredding system delivers the highest shredding performance and efficiency along with maximum flexibility in choosing the correct Security and bulk reduction level for a given application.

KOBRA COMPACTOR C-500 is designed to work with the Cyclone industrial shredder when paper is being shredded.

This optional accessory compresses and reduces the volume of the shredded paper by 4 to 5 times to minimize the space required for disposal.

Easy to install and operate, the KOBRA COMPACTOR C-500 will work with any security level screen. Compacted shredded material can be collected into any type of container or into plastic waste bags easy to dispose of by the built-in-trolley.

* KOBRA COMPACTOR C-500 is designed and suitable for compacting paper only.
